STRENGTHS

- **Cybersecurity fundamentals** in networks, identity and access management, and web application security, with experience implementing authentication protocols and secure data handling.
- **Project coordination and reporting** through structured trackers, RAID-style logs, and status updates, ensuring accurate deliverables and smooth execution.
- **Data analysis and automation** using Python for log parsing, process optimization, and repeatable reporting to support audit readiness.
- **Frontend development** with **HTML**, **CSS**, and **React.js**, building dashboards and interfaces that communicate technical findings effectively.
- **Clear written and verbal communication** for translating complex technical issues into actionable insights, strengthening collaboration with both technical and business stakeholders.

WORK EXPERIENCE

Customer Experience Associate (Part-time)

February 2025 – Present

Scotiabank

Etobicoke, ON

- Processed day-to-day **banking transactions** with a focus on **accuracy**, **confidentiality**, and compliance with **financial security protocols**.
- Assisted clients in resolving **account and service issues**, reinforcing trust by handling **sensitive information** securely and maintaining professional communication.
- **Trained and mentored new hires** while taking initiative to perform **senior-level responsibilities** during peak periods and complex cases to maintain service quality and team efficiency.

AI-Powered Coaching Assistant Developer

March – June 2025

Easy Artisan Websites

Toronto, ON

- Built and deployed a personalized AI chatbot using **OpenAI**, **Flask** and **Pinecone**, with memory and user context integration.
- Configured a secure **custom subdomain** via **Heroku** and **Cloudflare**, enabling public access with **SSL encryption**.

Mobile App Developer Intern

March – June 2024

GoKaddal Technologies

Toronto, ON

- Designed and implemented secure mobile application features, including **data handling systems** and **user authentication protocols**, ensuring secure operations and user trust.
- Developed interactive, user-centric interfaces tailored to enhance **client engagement** and meet business objectives effectively.

SOFTWARE AND DEVELOPMENT PROJECTS

Trip-Sharing Simulation App

May – June 2023

University of Toronto

- Developed a **Python**-based simulation system, utilizing **data analysis** to reduce rider wait times by 25% and enhance **system efficiency**.
- Applied **object-oriented programming** to build a scalable solution for **real-time event management**, supporting dynamic workloads.

Tree-map Visualizer

July – August 2023

University of Toronto

- Created and optimized a **JavaScript**-based tree-map visualization tool, increasing user engagement by 20% through an advanced, intuitive API that supports interactive navigation and dynamic resizing.
- Streamlined the development process by leveraging **efficient coding practices**, reducing overall development time by 30%.

EDUCATION

Bachelor of Science, Computer Science

September 2022 – Current

University of Toronto

Toronto, ON

- Graduating in June 2027.
